

What should I already know?

-The colours red, yellow, blue and green.

What colours can you see in this picture of the rainbow?

What objects do you have at home in these colours?

Light Sources

Sources of light help people to see when it is dark.

The sun, stars, torches, lamps and flames are sources of light.

Filters can change the colour of a light.

torch

sun

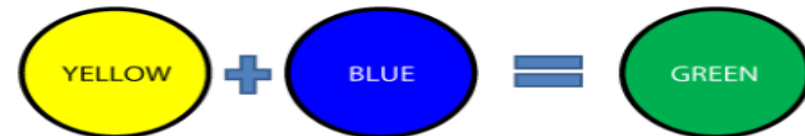

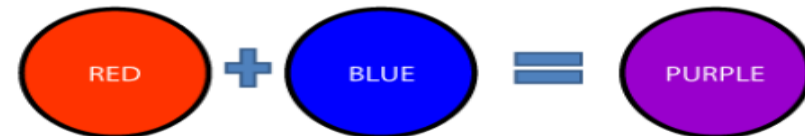

stars

flames

When you mix colours together, you can make new colours.
Have a go at mixing these at home!

Autumn

In autumn leaves change colour.
During autumn leaves fall from the trees.

In autumn conkers, leaves, pine cones and sycamore seeds can be found in the environment.

Go on a colour walk

Talk about the colours you can see outside. Look at trees, flowers, houses, signs and shops.
